2018 Community Daze Fire Prevention Requirements**

Community Daze has always been a fun event for the entire community. As with all events posing potential hazards, common sense and safety should always be first and foremost in our minds. Electrical extension cords used for any purpose should be appropriately labeled, meet all UL ratings, not be overloaded beyond their capacity and placed or protected so as not to create a tripping hazard.
3. Users of LP gas should adhere to the manufacturer's recommendations when attaching an LP gas cylinder to the heating unit. All LP gas appliances, connectors and hose lines should be in good working condition and free of any defects which may present a hazard.
4. Cooking appliances should be located so as not to present a fire hazard to any tent or canopy and must also be located so as not to present a hazard to the participants or the public.
