Geriatric Care Management

"Unicity has been there to guide us at every step and has surpassed all our expectations."

When Should You Call?

You will benefit from the expertise of our experienced Geriatric Care Managers if:

- You are concerned about a loved one and don't know what to do and where to turn.
- Your family has limited time and/or expertise in dealing with your loved ones' chronic care needs.
- Caregiving is affecting your family, your job and your own level of stress.
- You are considering a change regarding the living environment of a loved one.
- You want to plan ahead to avoid a crisis situation.
- A loved one is being discharged from a rehab/nursing center or hospital and requires further care.
- You are in a crisis situation or you notice a change in behavior.
- The person you are caring for has limited or no family support.
- You are providing care at a distance.

Alzheimer's and Dementia Care

Guidance

Alzheimer's Disease being progressive, it is essential that care be supervised and adjusted at each stage. Our Geriatric Care Managers can guide you through the appropriate care alternatives.

Training

All of our staff receive ongoing training sessions on Alzheimer's and other related forms of dementia.

Expertise

Our Care Managers are dementia experts/practitioners with significant experience dealing with clients and their families.

Customized Care Solutions

Our care assessments are customized to each individual's needs.

Activity Planning

For clients whose best care alternative is home care, we offer dementia activity planning. Our unique plans allow stimulation and engagement in a personalized way.
