Home Care

"Our aide always has a smile on her face and treats my father with respect and dignity."

Why Choose Unicity Eldercare?

The Quality of Our People: Experience, Training & Supervision

We are a people company servicing people.

Our people are a mix of **experienced and successful healthcare professionals** that continually strive to implement the industry's best practices and quality assurance procedures.

Our caregivers are either Certified Home Health Aides (CHHAs), Certified Nursing Assistants (CNAs), Licensed Practical Nurses (LPNs) or Registered Nurses (RNs).

Our recruitment process is very stringent. All our aides are required to:

- Pass interviews conducted by Unicity's Human Resource Department
- Pass behavioral and competency tests
- Submit to our extensive criminal and medical background checks
- Possess a valid authorization to work in the U.S.
- Attend mandatory extensive in-house training conducted by our Director of Nursing and our Certified Dementia Practitioners

Our training policy is at the core of our organization. All our staff undergo regular in-service training sessions. Unicity also uses the most renowned trainers including the Alzheimer's Association and other healthcare providers.

Our supervisory team consists of Registered Nurses, Licensed Social Workers, and healthcare professionals who bring experience, dedication and quality care. Our nurses make regular **quality assurance** visits to make sure the plan of care is followed.

Individualized Service Plan:

Every individual is unique.

We believe **customization** is essential to make the homecare process work. All Unicity's clients benefit from an individualized service plan prepared by our Director of Nursing. Our plan of care incorporates all aspects of the person's condition and life in general.

Communication and responsiveness play a vital role in homecare. We work hand in hand with all responsible parties. We want our clients' families to know that we are here to listen, advise and do whatever we can to ensure their loved ones receive the highest standard of care.

Alzheimer's & Dementia Care:

There is no better care than one-to-one care.

Our caregivers are fully trained in Alzheimer's and Dementia Care. Unicity has partnered with the most renowned Alzheimer's and Dementia professionals and our aides go through our **specialized Dementia training program**.

Our caregivers follow the most advanced techniques in caring for individuals with Alzheimer's. Among several approaches, we emphasize **validation therapy**.
