Re: Use

You can use the app for commercial purposes, but you need to leave the watermark 'NewProfilePic' in the picture OR write "Made by NewProfilePic" in any place of the image or give credits to the app in the credit section of your website or/and social media page.

I would like to potentially use images created with newprofilepic.com on my business website & social media accounts...is that possible? What permissions would I need, or licenses to purchase?

Thanks.
