

Gold[™]

**Simple. Powerful. Sound Masking
Solutions for Smaller Work Environments**

Creating Successful Work Environments

As a professional, you recognize how important it is to create the right environment to do business. Making your place of business comfortable and private for employees and clients is critical to your success.

Privacy laws continue to play an important factor in today's work environment. Whether it is financial, human relations, or medical information, privacy is an important consideration in designing any space.

Lencore Gold sound masking can achieve an environment where you feel at ease.

Sound Masking and Gold™

Sound masking works by introducing a unique, broadband sound complementary to the speech spectrum that effectively covers indirect speech levels. This scientifically engineered sound is amplified through individual speakers installed above or in the ceiling throughout the space that ensures complete and uniform coverage. Raising the background sound in an environment over indirect speech levels covers, or masks, unwanted office noise. As a result, overheard speech becomes less intelligible, and therefore, less noticeable.

Lencore sound masking continues to be rated the most comfortable in the industry. The Lencore Gold Unit is an all-inclusive system for environments up to 12,000 square feet. The self-contained system mounts into a rack, hangs on the wall or sits on a shelf. Standard cable runs from the unit out to the speakers which are daisy-chained together to provide the most comfortable sound in the industry.

In addition to the sound masking, Gold offers one audio input source that is ideal for adding background music applications.

Speaker Options for Your Environment

Your taste and your space are unique which is why Lencore offers a variety of options when it comes to installing speakers at your business.

- 4" Direct Fired speakers, such as the Gold Tangent and Gold Decorative Pendant speakers*, are exposed and point downward directly into the space.
- In-Plenum speakers, installed above the ceiling, fill the plenum space with sound before gently filtering down to the space below to mask speech.

Both methods are very common and effective in the sound masking industry.

Gold Direct Fired Tangent

Gold In-Plenum Universal

Gold Decorative Pendant

*Pendant speakers have a black and white option

Gold™

Gold is ideal for your unique space as it delivers incredibly comfortable sound masking for up to 12,000 square feet. The system utilizes channels for controlling speakers and zones in order to

enhance your work environment and protect speech privacy. It also provides background music, if you choose to connect an audio source (such as an iPod) that allows you to customize your occupants' experience.

Features and Benefits of Gold

- Complete comfort, privacy and productivity coverage for your space through 8 independent channels with up to 8 speakers per channel for a total of 64 speakers
- Flexibility in set up and control of the various work environments within your space, from reception area to private rooms and corridors, with enhanced zoning capabilities
- Dynamic controls, either through ethernet connection to the network software, called System Manager, or additional hardware components such as remote control or wall plates, give you the ability to easily adjust the system and provide a customized experience
- Music through RCA input connection can be zoned to specific areas of your workspace
- Easy to read LCD display and LED performance indicators for system performance and trouble-shooting

Applications:

- Healthcare
 - Doctor
 - Dentist
 - Pharmacy
 - Independent Healthcare Spaces
- Office Environments
 - Law Offices
 - Insurance Offices
 - Private Work Spaces
 - Small Offices with Open Plans

Gold helps to protect speech privacy and ensure HIPAA, GLBA and other privacy act compliance. Sound masking improves speech privacy and confidentiality by raising the ambient background sound. Sound masking helps make indirect conversation unintelligible and reduces incidental disclosures.

Optional Wall Plate Controller (not included) provides volume and contour flexibility

Lencore manufactures system solutions for Sound Masking, Paging and Audio with applications in a variety of industries, delivering speech privacy and productivity, with exceptional comfort.

Founded in 1990, Lencore has installed sound masking, paging and audio systems for thousands of companies in over hundreds of millions of square feet across the United States and around the world.

With the most advanced technology and by offering more choices with proven results, Lencore is in the position to meet the challenges and demands that affect your facility.
