

PRODUCT SHEET & SPECIFICATIONS

GOLD

IR HUB/ IR WALL CONTROLLER

MODEL G964 / G42

FUNCTION

The Gold A1U has an integrated IR Port that can be connected to the IR Hub (Model #G964) and IR Wall Controller (Model #G42) to provide up to four individual channels per A1U.

Using an IR Hub channel, one can make volume and contour control adjustments for masking and music by pointing a remote control at the IR Wall Controller.

This type of application can be typically used for various spaces such as private offices, conference rooms, healthcare facilities, and areas where remote control adjustments are required.
