

# i.Net IR HUB / IR WALL CONTROLLER WITH REMOTE

MODELS G964 / G42 + G16

## FUNCTION

Each OP (sound source) of the i.Net System has an integrated IR Port. This port can be connected to the IR Hub (Model #G964) and IR Wall Controller (Model #G42) to provide up to four individual audio channel controls per i.Net OP.

Using an IR Hub channel, one can make volume and contour control adjustments for masking, paging and music by pointing a remote control at the IR Wall Controller. The remote (Model #G16) comes bundled with the IR Wall Controller (Model #G42). Both sold separately from the IR Hub (Model #G964). The IR Hub is also compatible with the Model #G41 IR Wall Controller (not shown).

This type of application can be typically used for various spaces such as private offices, conference rooms, healthcare facilities, and areas where remote control adjustments are required.

## ENCLOSURE

- + Aluminum Housing
- + Dimensions – 7" X 6" X 1 3/4"

## WALLPLATE

- + Dimensions - 2 3/4" x 4 1/4"
