

As workplaces transition back to the office, achieving Productivity and Comfort, while balancing Collaboration and Privacy are paramount to your employees' well-being. Our sound masking solutions are flexible, adaptable and configurable to any office set-up, allowing employees to be productive and stay focused on what's important. The future of workplace environments may be uncertain. Our solutions are not. Through Lencore's state-of-the-art sound masking and audio integration technology, we can engineer the perfect solution for in-office, remote and hybrid work environments:

#### **In-Office**

- Control the acoustical environment to provide Productivity and Comfort while balancing Collaboration and Privacy
- Allow employees to focus on the task at hand
- Boost team collaboration
- Increase employee satisfaction and overall well-being
- Adaptable, scalable and configurable for any office setup, now and in the future
- Proven, powerful ROI

#### **Hybrid**

- Increase collaboration between remote and in-office employees with audio solutions that control the acoustical environment to maximize overall productivity
- Execute seamless audio integration and sound management to bring remote and in-office workers into a collaborative environment
- Achieve acoustical consistency in at-home and in-office work environments

#### **Remote**

- Overcome at-home noise distractions and focus on what's important
- Bring remote and in-office workers into a collaborative environment with seamless audio integration
- Achieve the best remote environment possible with acoustical consistency
- Mirror in-office productivity at home

# Our portfolio of products meet your essential demands

## In-Office

As barriers go up, hard antiviral surfaces are integrated, workspaces are moved apart and office capacity is uncertain, it is essential to maintain a productive work environment. The dynamics of noise (or silence) can cause a number of distractions, sapping the office of productivity. We can help in a way that has proven ROI and pays off starting on day one.

## Hybrid

Whether you're ensuring the new huddle space allows for clear communication during a meeting without nearby distraction, or seamless audio integration and sound management to bring remote and in-office workers into a collaborative environment, Lencore uses state-of-the-art technology to engage your intended audience, while keeping conversations private from the unintended audience.

## Remote

Dogs barking? Kids playing? Noisy neighbors? At-home distractions have become the norm for remote workers. Our technology helps your remote team stay focused on the tasks at-hand, while helping them to manage the everyday distractions at home, and to mirror the warm, comfortable sound of a Lencore-fitted office.

Also looking for background music or paging? Our adaptive systems can provide that too!
