

CONCENTRATION+

MODEL LD22

FUNCTION

Concentration+ generates sound masking and connects to Bluetooth devices for audio. High quality audio with Lencore's "Dome" dispersion - 360 degrees plus upward sound to fill the room with sound masking or music.

Place it in the center of a room, in a corner, or on the floor and the sound will radiate around the room. High quality sound from advanced technology. A powerful transducer, digital signal processing, and a specialized acoustical deflector produce loud and crisp sound along with Lencore's legendary sound masking technology – the most comfortable sound masking in the industry.
