

Dear Madison,

How are you doing with in the USA? Hope all is all. It with great joy that I am writing you this letter after receiving your letter, I am 11 years old and I am in Free Town, East Urban, Sierra Leone, West coast of Africa. I am in class/grade 6 and I like to sing and dance for my school, whenever we have any activities at school. It is one of my favorite things I like to do at school.

The name of my school is Berean preparatory school. it is a Christian school, but due to not having a permanent building, we are using the church building.

The fun I like to do at school or during recess is playing balance ball, this game is played by having two team, one team having two people to stand on one end to the other at a distance, sending the ball in order to hit the opponent at the middle who is there to balance the ball, the amount of ball one balance will be counted and that determine the winner. I also like challenging of spelling competition with my class mate here.

My favorit subjects are language arts and basic science. I am the only child to my mother for now, but I have two step sisters and two steps brother to my Dad, I am living with my mother who is a petty trader.

During the weekend I often help my mother in her petty trading, because it is out of that she takes to support me in school.

How is the weather and climate like in the USA? Here we are in the raining season, so the temperature most time is cool during this period,

We have six month of raining season, from May to October, and six month of dry season from November to April. It hot during the dry season, temperature get higher. Our school year run for 11 months, September to July, three term in one academic year. What about you, how does you school years run?

Here is my school building

Thank you

Your pen pal , Josephine Adelle Michealla.
