Franklin Medical Center Welcomes New Provider Ally Flint

Hampton, IA – Franklin Medical Center (FMC) is pleased to welcome Ally Flint, PA-C, to its healthcare team. Ally has returned to her hometown of Hampton to begin serving patients at FMC, bringing a patient-centered, communication-focused approach to care.

A Hampton native, Ally is a graduate of Hampton-Dumont High School. She earned her undergraduate degree from Creighton University and went on to complete her Master's in Physician Assistant Studies at the University of Dubuque. Her return to Hampton is especially meaningful, as her interest in healthcare began locally while taking an EMT course during high school.

“My approach to patient care is rooted in communication,” said Flint. “I believe strong relationships start with listening and understanding what matters most to each patient. I prioritize shared decision-making, so patients feel informed, heard, and involved in their care.”

Ally is excited to reconnect with familiar faces and care for new patients in the community she calls home. She looks forward to becoming more involved locally and giving back to the place that helped shape her journey into medicine. She is particularly enthusiastic about FMC's collaborative, team-based environment and the opportunity to provide comprehensive, high-quality care close to home.

“Hampton has always felt like home—not just because my family is here, but because of its strong sense of community,” Flint shared. “It's incredibly rewarding to return and serve this community as a provider at Franklin Medical Center.”

Outside of work, Ally enjoys spending time with family and friends, attending sporting events—especially Iowa teams (“Go Hawks!”)—and spending time outdoors. She and her husband recently welcomed a puppy and enjoy taking walks around the community.
