

# Severe Storms Possible this Afternoon & Evening

May 19, 2025  
4:16 AM

For the Western Carolinas and Northeast Georgia

## OVERVIEW

A few strong to severe storms are possible this afternoon and evening, **mainly along and west of I-26.**

### TIMING

This afternoon and evening, **mainly from 3pm to 8pm.**

### HAZARDS & IMPACTS

Damaging wind gusts and large hail are the main hazards.

### NWS ALERTS

None at this time.

### FORECAST CHALLENGES

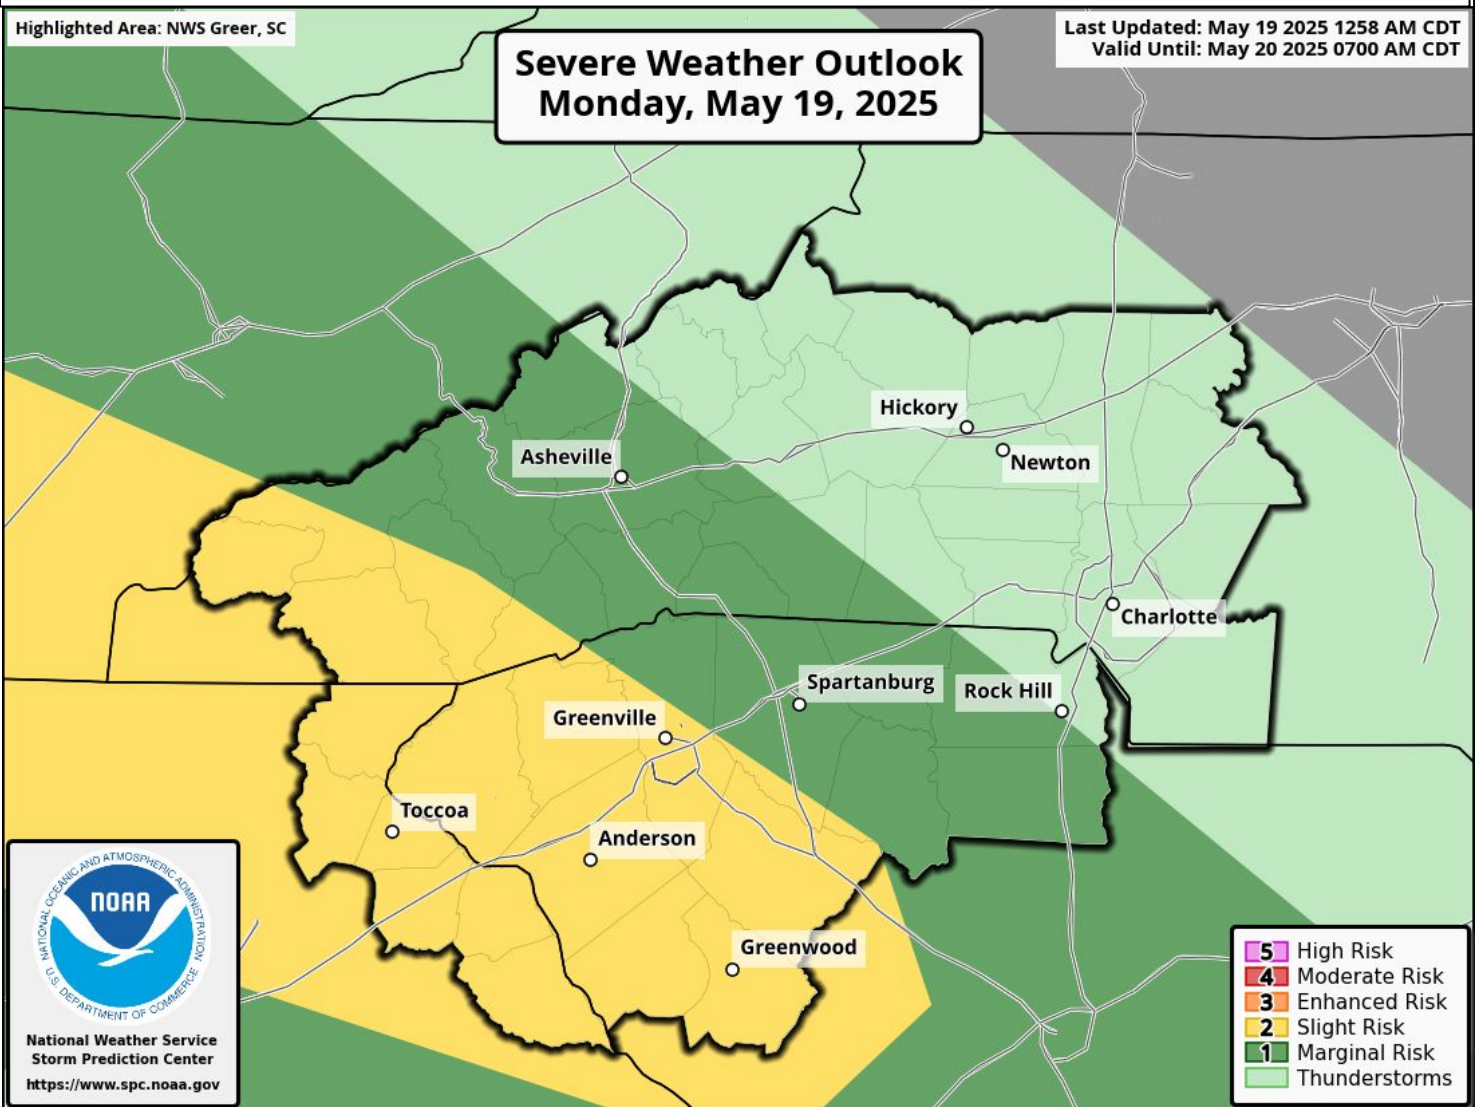

How well storms will hold together as they track across the forecast area.

### POST-EVENT OUTLOOK

Strong to severe storms are possible Tuesday evening into Tuesday night (**see slide 2 for information on Tuesday's severe threat**).

### NEXT BRIEFING

By 6 PM Monday, May 19th, 2025

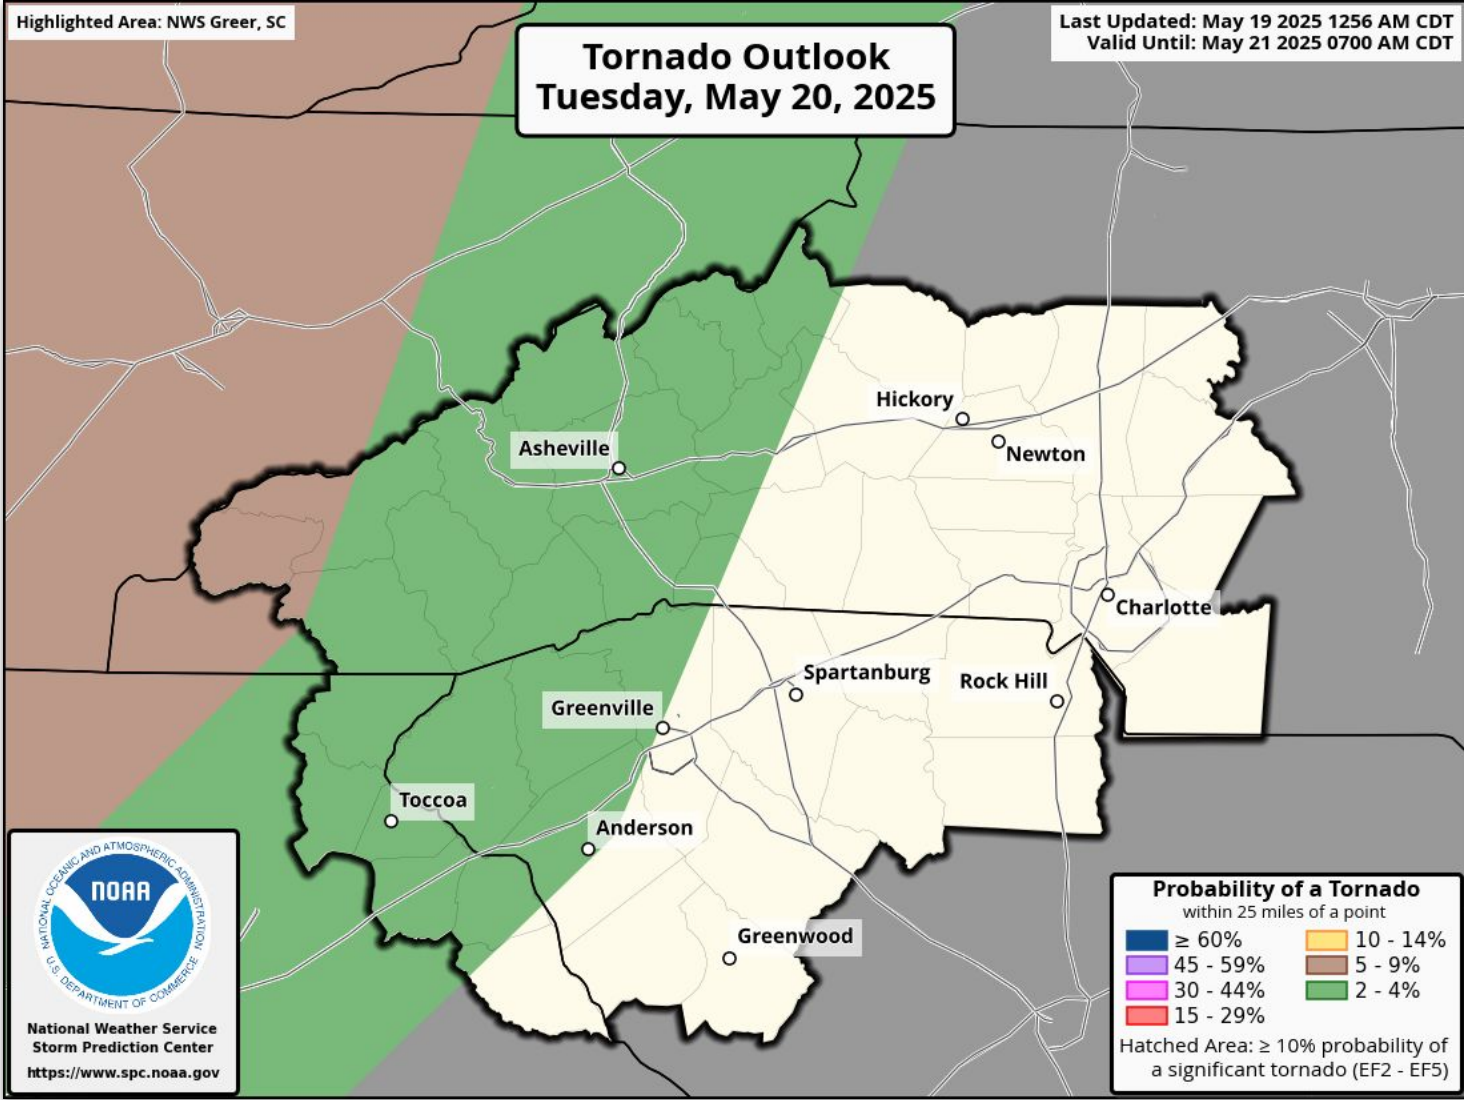

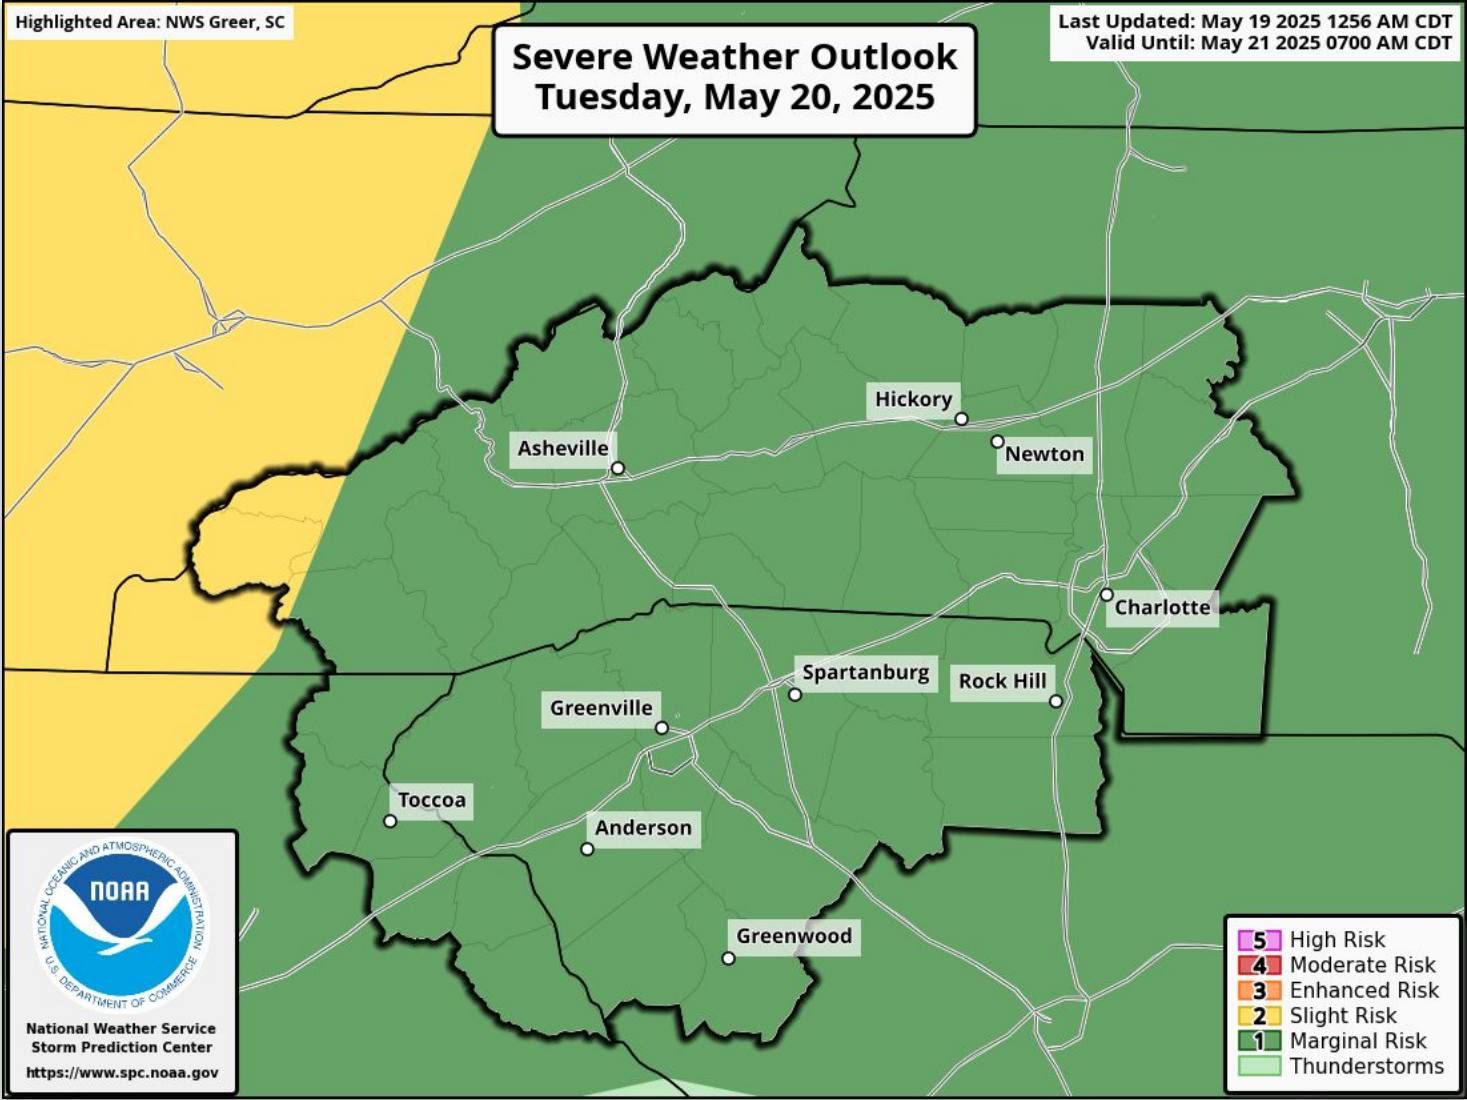

# Severe Storms Possible Tuesday Evening into Tuesday Night

May 19, 2025  
4:16 AM

For the Western Carolinas and Northeast Georgia

Strong to severe storms are possible **Tuesday evening into Tuesday night**. **Confidence on the severe threat remains low** as activity is expected to gradually weaken as it pushes east of the North Carolina mountains.

Damaging wind gusts and large hail are the main hazards. However, **an isolated, brief tornado cannot be entirely ruled out, mainly across the western zones**.
