

LEDGER SIGHTINGS

If it looks like a UFO or “flying saucer”, is it??

Meteorologists say it's a *lenticular* or wave cloud, some MUFON members say that the Mother Ship hides inside and sends out scout ships and one metaphysical view is that it's a *5th dimension ship*.

The March 22, 2000, *Incident Report* in the Mitchell News-Journal included a reported UFO sighting in Ledger. The series title resulted, along with a UFO sighting reportedly occurring in the fall of 1981 in Ledger.

Ledger Sighting Series photos for sale at DT's Blue Ridge Java Coffee Shop and Cafe, with other amazing lenticular cloud images ALL shot by photographer Doug Sudduth from his property on Wing Road in Ledger.
