REDUCE SYMPTOMS, KEEP ACTIVE, STAY CONNECTED

Research shows that consistent exercise benefits people with Parkinson's disease, helping to protect certain areas of the brain affected by the disease. Exercises that focus on balance, coordination, and agility, help those affected by Parkinson's to maintain higher levels of function and greater quality of life.

SCHEDULE NOTES

- Schedules are subject to change. Please ensure that you are a part of the Parkinson's Body and Mind email list to ensure you receive any updates.
- Classes reserved for those registered in the Greenwich YMCA Parkinson's program.
