HOME CANNING CONTEST

USDA Recommendations must be followed. Standard canning jars and lids must be used (all jars must have canning rings on top). Canning must have been done within the past year. **Rings and lids must be clean and free from rust. Jars will not be opened.** Label all jars on side as to contents (but no name). Overall winners will be awarded based on the amount of points received in the amount of 1st - \$40, 2nd - \$30 and 3rd - \$15.00.

Do I really need to leave a certain amount of headspace in the jar?

Yes, leaving the specified amount of headspace in a jar is important to assure a vacuum seal. If too little headspace is allowed the food may expand and bubble out when air is being forced out from under the lid during processing. The bubbling food may leave a deposit on the rim of the jar or the seal of the lid and prevent the jar from sealing properly. If too much headspace is allowed, the food at the top is likely to discolor. Also, the jar may not seal properly because there will not be enough processing time to drive all the air out of the jar.

HEADSPACE GUIDELINES: These headspace recommendations come from the National Center for Home Food Preservation. When in doubt, please consult the Extension Family and Consumer Sciences Agent. •
